Printed from Asana

## Feature Requirements

☐ Users can see activity notification in a feed

Feature Requirements Mapping: Feature 1

☐ Users can follow other users

Feature Requirements Mapping: Feature 2

☐ Users can rate locations

Feature Requirements Mapping: Feature 3

## Product Backlog

☐ 2.1. As a first time user searching for people, I want to search for people by their user id or name, so that I can find new locations to visit based on their activity.

Feature Requirements Mapping: Feature 2

☐ AC 1: Given that I want to search for people by their user id, when a user id or name is typed, then the search should show results based on id or name as well

☐ AC 2: Given that I should be able to search for people, when I click on the search bar, then the keyboard should pop up in text mode

☐ AC 3: Given that I should be able to search for people by ID, when "@" start a search, then the search should show no results

☐ 2.2. As a new/existing user searching for people with text in "friends", I want to see who I am not already following, so that I can start following them

Feature Requirements Mapping: Feature 2

☐ Given that I am searching for people in the database that I am not yet following, when a person is presented in the search that I am not following, then I should expect to see no additional text

☐ 2.3. As a new/existing user searching for people with text in "friends", I want to see suggested people as I search in the search bar, so that I can see my searches as I type

Feature Requirements Mapping: Feature 2

☐ Given that I want to see live search results, when I enter the first letter of my search, I should already see a filtered list based on that letter

☐ Given that I want to see a filtered list, when special characters are entered, I should expect to see no search results

☐ 1.4. As a user, I want to be able to receive an update when a friend has changed their status, so that I can stay up to date on where my friends are visiting.

Feature Requirements Mapping: Feature 1

☐ AC 1: GIVEN that I want to stay up to date on where my friends are visiting WHEN they change their status THEN I should receive an update in my feed.

☐ 1.2. As a user viewing the feed, I want to see a card that signifies a new follower so I know I am growing my following

Feature Requirements Mapping: Feature 1

☐ AC 1: GIVEN that someone has added me as a friend, WHEN I refresh my feed, THEN I should see a card displaying a new follower.

☐ 1.3. As a user, I want to be able to follow people who follow me by clicking on their card, so that I can see their reviews

Feature Requirements Mapping: Feature 1

☐ AC 1: GIVEN that I want to be able to follow people who follow me WHEN I click on their card THEN I should be following them

☐ AC 2: GIVEN that I want to be able to follow people who follow me WHEN I click on their card THEN I should see their activity in my feed

☐ 1.1. As a user viewing the feed, I want to see updates of newly added places, so that I can be up to date and engaged.

Feature Requirements Mapping: Feature 1

☐ AC 1: GIVEN that I want to be up to date and engaged, WHEN I open the feed, THEN should see the most recent update available on the app from my friendship group.

☐ AC 2: Given that I've added a new friend, when I go back to the feed, then I should see their updates.

☐ 2.4. As a new/ existing user searching for people with text in "friends", I want to see profile pictures against people I search for, so that I recognize people that I am searching for.

Feature Requirements Mapping: Feature 2

☐ AC 1: Given that I want to see profile pictures in my search, when a user has a profile picture, then it should be displayed to the left of their name and user id

☐ AC2: Given that I want to see a filtered list, when special characters are entered, then I should expect to see no search results

☐ 2.5. As a new/ existing user searching for people with text in "friends", I want to see a person's name against people I search for, so that I know that I have the right person

Feature Requirements Mapping: Feature 2

☐ AC 1: Given that I am searching via test, when I clear the search field, then the keyboard should pop up

☐ 2.6. As a new/ existing user searching for people with text in "friends", I want to see how many lists people in the search have, so that I can see if I want to look at that person's profile

Feature Requirements Mapping: Feature 2

☐ AC 1: Given that I am searching for friends, when a search is presented, I should only see results based on that search

☐ AC 2: Given that I can see a list of friends from the search, when I view the search results, then the number of lists that a person has should be displayed next to their name

☐ 3.1 As a user of Blind Tiger App I should be able to see a page with options to rate the places of interest, so that me and my friends who follow the app can decide on places to be visited.

Feature Requirements Mapping: Feature 3

☐ GIVEN THAT I want to be able to see a page showing options with logos "Loved it", "Liked it", "Hated it", "want to go" WHEN I navigate through the rating page of Blind Tiger App, THEN I can select any one of the above four options.

☐ 3.2 As a user I should be able to read the sentence "How do you rate it?" and "Let others know how you feel about a place, and remind your self" so that the App users can under stand that they are currently at rating page.

Feature Requirements Mapping: Feature 3

☐ Given that I want to be able to see the text "How do you rate it?" with font size 14 and the text "Let others know how you feel about a place, and remind your self" with a font size 10 When I navigate through rating page, Then I can read and better understand the importance of these two sentences.

☐ 3.3 As a user I want to be able to view all the reviews given by users, so that I can understand the reason behind the rating.

Feature Requirements Mapping: Feature 3

☐ Given that I want to be able to view all the reviews on the Blind Tiger App When I navigate to the rating section, then I can read and understand the user reviews.

☐ Given that I want to be able to view the count of the reviews on the app When I navigate to the rating section, then I can see the number of users who rated the App with available options.

☐ 3.4 As a user I want to be able to like or dislike any comment so that other users, can easily decide whether they want to consider this review or not.

Feature Requirements Mapping: Feature 3

☐ Given that I want to be able to like or dislike the comments When I navigate to comment section of the App, Then I can select click on the thumb up emoji to like and thumb down emoji to dislike the comment posted on the comment section.

☐ 3.5 As a user I want to be able to upload a picture or video so that I can support of my review.

Feature Requirements Mapping: Feature 3

☐ Given that I want to be able to upload a picture or video of the places I visited on the App, When I navigate to rating section, Then I can upload pictures and videos of high resolution up to 1GB for better clarity and vision.

☐ 3.6 As user I want to see the graphical representation of the ratings of all four options so that I can get an idea of the overall results of the rating at a glance.

Feature Requirements Mapping: Feature 3

☐ Given that I want to be able to view the graphical representation of the results of rating, When I navigate to the rating section, Then I can click on bar graph or line graph for better understanding.
